S.L.P.A. Specifications		Supplier's Comments
General	<p>In line inductors to be used with 450L/M foam branches.</p> <p>The design of the proportioning part enables an exact liquid admixing rate between 1% to 6% of the passing water quantity</p>	
Filter and drive nozzle	Stainless steel	
Materials	Should be light weight and corrosion resistant	
Couplings	Standard 70mm instantaneous male and female couplings.	
Features	<p>Low pressure loss (30% to 40%)</p> <p>Pressure range 05 bar to 10 bar</p>	
Certification	Product shall be complied with BS/NFPA or other equivalent standards	
Details	Full details with clear photos of the product shall be submitted with the bids
